

CHRONIC ENVIROMNTAL DEFICIENCY RETROFIT: DEFINITION & ELIGABILITY CRITERIA

14 September 2004

CED Definition:

A CED is defined as an adverse habitat condition found at a discrete location associated with a WSDOT transportation infrastructure where recent (< 10 years) and frequent (at least 3 fixes) repair and or maintenance actions have negatively impacted fish and/or their habitats.

Eligibility Criteria/Dichotomous Key

1. Does the candidate CED site meet the CED definition?
Yes: Go to #2
No: Not a CED
2. Does the candidate CED site qualify under another WSDOT funding category (e.g. unstable slopes, bridge scour, fish passage)?
Yes: Not a CED
No: Complete CED checklist and go to #3
3. Does a solution present itself?
Yes: Add to the CED Short list
No: Go to #4
4. Department of Fish & Wildlife Concurrence?
Yes: Proceed w/reach evaluation, go to #5
No: Table it
5. Reach Evaluation
 - a. Complex site w/significant data needs: Complete a Reach Analysis and go to #6
 - b. Simple site with small data needs: Complete a Reach Assessment and go to #6
6. Add sites (from a and b above) to un-ranked list of eligible sites.
